

# CANDICE TELLS ALL

Episode #112

Design Principle | **Design with Focus**

The Design | Without focus, a room lacks presence and yet when the focus is wrong, that is all you notice. That is exactly the case for a young couple who turn to Candice to help them with their living/dining space. Candice dips into her design tool bag to take this room from blank slate to bold space.

**Tip from Candice** | When designing a multi-purpose space each zone should have one main focal point that anchors it. A fireplace and custom cabinetry wall are examples of natural focal points. Unique and visually interesting elements can act as focal points that define and ground smaller areas. A textured dark wall defines the seating area and a chandelier anchors the table.
